The screenshot shows the Elasticsearch Head extension running in a Chrome browser. The main interface displays a table of search results for the query 'clusters'. The table has columns: _index, _type, _id, _score, cluster, and servers. The results show four documents from the 'clusters' index, each with a score of 1. The clusters are Tahoe (150 servers), Michigan (904 servers), Rhino (1208 servers), and Amazon (856 servers). On the left, there are dropdown menus for 'All Indices', 'INDICES' (selected to show 'clusters'), 'TYPES' (selected to show '_doc'), and 'FIELDS' (selected to show 'cluster' and 'servers'). The top navigation bar shows various tabs like 'elasticsearch' and 'cluster health: green (1 of 1)'. The bottom of the screen shows the Mac OS Dock with icons for Finder, Mail, Safari, and other applications.
